Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 3-5, drawn to an EVA based film composition, classified in class 521, subclass 82.
- II. Claims 1, 1 and 4-5, drawn to an EVA and ethylene copolymers, classified in class 521, subclass 62.
- III. Claims 6-27, drawn to a method for manufacturing shoe components, classified in class 12, subclass 146R.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions they are not disclosed as capable of use together and they have different effects. The compositions specifically claimed in claims 1 and 2 are different compositions based either on EVA polymer (claim 1) or EVA copolymer and polyethylene copolymer blend. The compositions have different properties (effect) and are not disclosed as usable together.

Inventions Groups II or II and Group III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially

different process of using that product (MPEP § 806.05(h)). In the instant case the process for using the product as claimed can be practiced with another materially different product. The process can be practiced with different products as exemplified by products of either claim 1 or claim 2.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group either Group I or II is not required for Group III, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
